

Express Service For Machined Seals

Express manufacturing of hydraulic and pneumatic seals in Effretikon Fast – precise - customized

Delivery time: small quantities in our standard materials are ready for pick-up or dispatch within a few hours. Up to outer diameter 380 mm, bigger sizes upon request.

Available materials: PUR, NBR, EPDM, FPM, silicone, PTFE, PEEK from stock, other elastomers and thermoplasts available on request.

Authorisations: some materials are approved for medical and food applications: FDA, USP Class VI, EN 1935/2004, 3A Sanitary, KTW, DVGW.

Requirements: in most cases, the fitting dimensions, the required type and the material are sufficient – we take care of the rest. In case of sensible applications please consult our technical team. We design your tailor-made sealing system.
